Used by professional
gardeners and
horticulturalists

For homes, residential
premises, greenhouses and
offices

Venso EcoSolutions – Quality Grow lighting and accessories.

Whether you're an amateur grower or a professional gardener, the same basic principle has always applied until now: Plants need daylight to thrive. But this is no longer the case, thanks to innovative Grow lighting that enables plants to thrive and grow even where there is no daylight at all. Our products are developed and based on findings from many years of research, tests and applications in real cultivations.

Venso EcoSolutions offers Grow lighting for homes, offices, greenhouses and conservatories. We have a wide range of solutions for consumers and professional growers alike. We've now expanded our range to include practical and stylish self-watering pots from Flower Lower and innovative air purifier pots from Airy.

A quality product range to suit all needs

Our range of Grow lighting is designed to meet plants' light requirements. That's why we make distinctions between the products in our range. We've got lighting for raising, growing and over-wintering plants, and supplementary lighting for plants in homes.

Supplementary lighting products for indoor plants

... transform even the darkest rooms and corners into a green oasis: Our products for indoor environments provide the right combination of white and red wavelengths to encourage growth and prolong flowering.

Products for wintering

... Our wintering grow lights provide light with a balanced mix of white and blue wavelengths to protect the root system and foliage for healthy winter dormancy. Suitable for wintering in a cool environment.

Products for germination and growth

... Promote strong, healthy growth right from the start. Our products for germination and fast growth of plants use the whole spectrum of essential wavelengths to encourage chlorophyll production and support photosynthesis.

Contents

SUNLiTE 7W Grow Lights

- Maintenance light for natural growth
- SUNLiTE is available in a variety of colours

4/5

SUNLiTE and miniHERB

- Grow lights for various applications
- Available in different versions and sizes.

6/7

Grow light bulbs (E-27)

- Grow lights for various applications
- Available in three versions

8/9

Grow light luminaires

- Designed for various applications
- From germination and supplementary light to wintering

10/11

SPOT LED Luminaires

- Lighting for windows, alcoves and living walls

12/13

COB250 and Trolley Kit

- Lighting for large areas
- Suitable for small-scale professionals and advanced amateur growers

14/15

Grow lighting accessories

- Adapted and selected for our Grow lights

16/17

Product characteristics – quick and easy

All our products are marked with symbols that show their suitability for their specific application area. This allows you to quickly and easily see the products' key characteristics.

SUNLiTE Orchid, SUNLiTE XL and miniHERB

SUNLiTE – New special-purpose lamps for more application areas

Now we're expanding our range of SUNLiTE products. SUNLiTE Orchid is designed for plants with higher light requirements. An increased power output of 10W provides greater light intensity.

SUNLiTE XL, the largest model, is suitable for large floor-standing potted plants. Ideal for Mediterranean plants like citrus, olive,

palm and ficus.

miniHERB is an easy-to-use kit for keeping your herbs alive. Smart storage that frees up worktop space and keeps herbs thriving by supplying essential light. miniHerb consists of a special herb trough and a SUNLiTE 10W lamp. miniHERB is available in two sizes.

SUNLiTE Orchid, SUNLiTE XL and miniHERB

 Part number 3 804 0210	SUNLiTE Orchid Provides a little extra light (10W) for more light-demanding plants such as certain types of orchids etc. • <i>Power 10W</i> • <i>Optimal wavelengths</i> • <i>Neutral white light colour</i> • <i>Light angle 120°</i> • <i>25.000 h Life timeslängd</i> • <i>Incl. Grow light bulbs E-27

Different plants have different light requirements, which can also vary between seasons and growth stages. Our Grow lights are designed for a range of application areas.

We have Grow lights for homes and offices, for applications including supplementary lighting, overwintering, raising and growing.

All these lamps can be used with a standard E27 socket, and we supply compatible lamp holders, fittings and lampshades in attractive designs.

A photograph of a silver metal A-frame luminaire hanging from a chain. It holds a long, rectangular LED light strip that is illuminated. Below the light, a green rectangular tray contains several small green seedlings in black pots. The setup is on a wooden surface against a brick wall. The luminaire is connected to a power cord on the left.

Grow light Luminaires

Our luminaires are equipped with innovative LED chips.

They deliver a combination of white, red and blue wavelengths for a range of application areas, such as strengthening root growth, prolonging and increasing flowering, increasing growth rate or wintering annuals. We've got luminaires for all purposes, from

the versatile Grow Light DUO to the powerful Grow Light Quattro.

Grow light Luminaires

Also for raising smaller plants

SPOT Grow Lights Lighting for windows, alcoves and living walls

SPOT

With a 30° lighting angle, our SPOT LED luminaires are ideal for lighting plants in windows and alcoves.

Thanks to their narrow lighting angle, our SPOT LED luminaires can be installed up to 1.50 metres above the plant. They provide excellent light with wavelengths optimised for plants' needs.

Also suitable for green living walls or vertical gardens.

SPOT LED luminaires are available in lengths

of 60, 90 and 120 cm.

SPOT-WALL

With a 120° lighting angle, our SPOT-WALL luminaires are ideal for lighting living walls. Thanks to their wide lighting angle, the LED strips can light a large expanse of a living wall. They provide excellent light with wavelengths optimised for plants' needs. Also suitable for vertical gardens.

SPOT-WALL luminaires are available in lengths of 60 and 120 cm.

SPOT LED Luminaires
