25W SUNLiTE XL WITH TELESCOPIC STAND

With its large lampshade (Ø160mm), the SUNLiTE XL 25 Watt LED grow light offers potted plants with high light requirements the optimum light wavelengths for healthier growth, especially during the dark season or in dark rooms. It is inserted directly into the plant pot with a telescopic stand. The stainless steel telescopic stand can be extended to a maximum of 1.70 m and is therefore particularly suitable for large indoor plants.

10W ORCHID SUNLiTE GROW LIGHT WITH TELESCOPIC STAND

The 10W Sunlite LED grow light is suitable for extra light demanding plants, such as orchids, and for small-scale cultivation of herbs and other small plants. It is suitable for indoor locations. The telescopic stand is made from stainless steel and can be pushed in the soil in a plant pot. The LED module has a combination of red and white LEDs that produce a neutral white light. The wavelengths of this light have been selected to allow your plants to thrive and grow naturally.

MINI HERB

miniHERB is suitable for storing purchased spices, but it is perfectly possible to grow your own plants, albeit on a smaller scale. It consists of a container, where you can place up to 6 pots, and a powerful 10W LED grow light that provides the plants with especially developed light for a natural growth. The LED module has a combination of red and white LEDs that produce a neutral white light. The grow light comes with an adjustable telescopic stand that is placed in the container. The telescopic stand can be adjusted to the height of the plants.

SPECTRUM

Wavelength (nm): 400 450 500 550 600 650 700 750

The product category winter was developed for cold overwintering of various Mediterranean potted plants, such as olive trees and citrus trees. With modern and energy efficient LED technology, your plants will enjoy a healthy and vigorous growth phase in the following spring.

Even in corners or in rooms without sufficient bright light, you do not have to do without real plants, if you offer the plants a suitable light spectrum through LED lamps. The light used should consist of the spectrum of the white and red wavelength range.

CULTURA

LED GROWLIGHT TECHNOLOGY

The Cultura product category was developed for cultivating a wide variety of herbs, vegetables and flowering plants. Modern and energy-efficient LED technology of the Cultura category supports the cultivation of your young plants with optimally matched wavelengths.

In addition to the influencing factors of seed, temperature and substrate, the necessary light is the limited factor when growing indoors. In addition, during the winter period, certain wavelengths are missing in the sunlight, which is scarce anyway. To provide the seedlings with the best possible light, it is best to help them out with plant lighting, ideally with LEDs.

INTERESTING FACT:

**DID YOU KNOW
THAT PINK AS
A LIGHT COLOR
DOES NOT EXIST**

PINK light does not exist in the visible spectrum of colors, meaning it doesn't have it's own wavelength. The color which is in between red and blue in the spectrum, is GREEN. The brain already has green cone cells

to show you a green color. So, when the two lights enter, the brain can't display green and therefor translates it into the color PINK!

PLANT LUMINAIRE FOR KITCHEN CABINETS

Grow White 475 plant luminaire is designed with full-spectrum light. This is a white LED light with a predominance of blue and red wavelengths, encouraging optimal growth and photosynthesis. It is used for seed starting and cultivation, or to provide extra light. The luminaire emits a nice white light that fits well in a home environment. The light emitted has excellent colour rendering, which displays your crops and ornamental plants with clear and vibrant colors.

#13 GROW LIGHTS

GROW WHITE 475

PLANT LUMINAIRE FOR GREEN WALLS

The LED WALL SPOT is suitable for illuminating green walls. The special wavelength ratio emits a beautiful white light, which emphasizes the colors of the plants, and provides a balanced growth and makes the leaves stronger and healthier. An angled bracket for mounting in the ceiling is included.

The special lighting angle of 30° makes our LED wall spots the ideal plant lighting system for windows and niches with little light. Thanks to their beam angle, the LED wall spots can be mounted at a height of up to 1.5 meters above the plants. The precisely coordinated wavelengths of our innovative GrowWhite spectrum ensures the provision of optimal lighting. This professional product is also ideal for lighting green walls and vertically arranged interior greenery. LED wall spots by PARUS are available in lengths of 60, 90, 120 and 150 cm.

GardenJoy

PRODUKTKATALOG 2022

Trädgårdsarbetet blir roligare med Garden Joy!

Blomstrande trädgårdar med färgstarka, väldoftande blommor sprider mycket glädje.

Att arbeta i sin trädgård eller med växter på sin balkong finner många nöje i och därför har vi skapat GardenJoy, ett sortiment med trädgårdsredskap som är tilltalande i såväl utseende som funktion och som skänker glädje i sin enkelhet.

Garden Joy trädgårdsredskap gör trädgårdsarbetet roligare! För glädje i trädgården helt enkelt!

Vi presenterar två noga utvalda kollektioner av trädgårdsredskap och tillbehör.

Flower Power är en färgstark kollektion av handredskap och tillbehör för trädgårdsskötsel och balkongodling som sprider glädje med sina härliga färger och vackra mönster.

Nature är en stilren kollektion i harmoniska naturfärger. Kraftfulla och gedigna trädgårdsredskap i trä och rostfritt stål och våra smarta trädgårdsväskor som underlättar trädgårdsarbetet. Väskorna är utformade med omsorgsfullt utvalda tyger för att underlätta och passa ett aktivt trädgårdsarbete.
